I think it is fine to share the current version, it does not have to be precise, I just want folks to be able to understand the scope of the document

thanks

Doug

Do you want to wait until after the 95% is submitted to get the final Table of Contents, or do you want the one I have right now (which is fairly final, although might be subject to a few tweaks)?

Hi, I think the CHASP presentation is excellent, I have no suggested changes to either presentation
I do wonder if we can get a pdf of the Table of Contents for the 95% design report, I think the slides are fine for laying out the different components but it would be nice to see everything in one place in some sort of order

thanks,
Doug

Just a reminder that I was hoping for feedback on these slides, if any, by today if possible.

Subject: Diamond Alkali: DRAFT Lower 8.3mi slides for CAG meeting

Attached are drafts of the slides we are proposing to present to the CAG at next week's meeting.

For the CHASP overview (PDF file), I will be transmitting the following minor comments to Occidental-Glenn Springs:

- Slide 10: Add capping to the 5th bullet
- Slide 11: Label the dredging platform
- Slide 14: Noise monitoring station is out of focus.

Please let me know if you have any additional comments by next Monday (3/7) if possible, to give presenters some time to make the changes. Let me know if you need more time for review.
